

## *CXM-ZG Automatic Capping Machine*

Automatic servo torque capping machine is based on the international advanced model to improve the design, the application of servo torque control capping speed, no damage to the cap, high qualification rate, simple and convenient operation. It can be applied to different bottle shape screw caps in food, pharmaceutical, daily chemical, pesticide, cosmetics and other industries. The machine has a high degree of automation, good stability, easy adjustment, (if equipped with a lid machine, it can be automatically covered) can be selected according to actual needs.

### **Technical specifications**

Adapt to bottle height	40mm-200mm(can be customized)
Adapt to bottle diameter	20mm-70mm(can be customized)
Capping speed	20-80b/m (depending on the filling volume, material and packaging material)
Air pressure (mpa)	0.5-0.7
Speed control	frequency conversion speed regulation
Equipment size:	1900X900X1600 (mm)
Power supply	220V/110V 50/60Hz
Power	2.0kw
