

Cylinder flip bottle washing machine BCGX100-01

The cylinder type bottle washing machine is improved and perfected by our company with reference to the model of similar foreign products. It has the advantages of beautiful appearance, reasonable layout, simple structure, convenient operation, and stable production. It is suitable for cleaning round bottles or special-shaped bottles with shoulder brackets inside and outside the bottles. It is alternately washed by two water and one gas (purified water, water for injection, and purified gas) to make the bottles meet the production process requirements, and the bottles are preliminarily dried. According to the production requirements, Optional ultrasonic device

Features:

- Unique structure, bottles are fixed by mechanical template and cleaned separately, low loss rate of bottles.
- The cleaning process is reasonable, and the cleanliness of the bottles after cleaning is high.
- Low water consumption.
- Simple operation and easy maintenance.
- It can be used for single machine production or linkage production line.
- Comply with GMP requirements.

Technical Parameters:

Model	BCGX100-01
Capacity	10~100 bottle/min
Applicable bottle type	5~1000ml Bottles that can stand
Purified water consumption	0.4~0.7t/h, 0.1~0.4Mpa
Speed control	Variable frequency speed regulation
Single machine noise	≤ 70db
Power supply	110/220V 50/60Hz
Power	1.5KW
Weight	≥ 600kg
Machine size	L:1700mm W:1000mm H:1500mm
