

## *LT-SC440V Automatic Capping Machine With Cap Feeder*

This full automatic capping machine is equipped with a cap feeder, which can orient bottle caps. Typically the cap feeder can be customized by making adjustments to the bowl for different sizes of caps. Larger caps and higher speeds may require larger bowls. These two machine can achieve automatically feeding caps and cap bottles, save labor and reduce production error.

### **Application:**

This machine is used for automatic capping of plastic bottles and glass bottles in cosmetics, food and beverage, pesticide and fertilizer, chemical industry.

### **Technical Parameters**

Model Name	LT-SC440V
Working voltage	AC220V/110V 50-60HZ
Power	1.9KW
Bottle height	≥250mm (Can customize)
Bottle caps diameter	20-50mm(can be customize)
Working speed	20-40bottles/min
Working pressure	0.4-0.6MPa
Size of air compressor connector	OD8mm
Size	250*140*213cm
Weight	About 400kg
