

# NM SERIES

## Automatic empty bottle unscrambler

The NM Series Automatic Empty Bottle Unscrambler is a high stable, flexible model for your demands of unscramble randomly distributed PET containers in a harmless manner. Equipped with multiple sets of engineering elastic belts for the purpose of bottle unscrambling and without causing additional scratches on the surface of PET container. In the case of different bottle specifications, this machine can be quickly adjusted via hand wheels and inter connected adjustment system. Minimizing downtime.

In the case of different bottle height, adjustable air conveyor and vacuum stabilizing conveyor can be integrated with bottle unscrambler. Resulting high degree of stability and repeatability. An excellent production capacity of 400BPM is the ideal solution of small to medium scaled production requirements.

- Capacity ranging from 4000 to 24000BPH
- Suitable for PET, PP and PE
- Suitable for round, square and rectangular bottle
- Constructed from SUS304 stainless steel and carbon steel
- Can be inter-connected with adjustable air conveyor
