

## *TY-701-300H L Bar Sealer*

### **Applicable products**

Box, container, shampoo, conditioner, book, magazine, notebook, toys, kitchenware, biotechnology products, tray, chemicals, bottle, can, soda, gift box, electronics, grocery, paper roll, tissue, wire, metal parts...etc.

### **Machine features**

- Suitable for product height 120-300mm.
- Sealing set height adjustable.
- Product entry height controlled by individual motor.
- Quick adjustment on product entry width.
- Stable & efficient operation by Mitsubishi PLC controller.
- Apply Omron timer for good control on sealing & cutting time.
- Adjustable Film feeding tension.
- Individual pin roller, pin position & amount adjustable according to request.
- Panasonic sensor for product entry reading.
- Cutting blade made by 1 pc for long time operation durability.
- Temp. controller with PID function.
- Stable heating performance by SSR.
- Abnormal warning on sealing & cutting set.
- Auto scrap film collection device.
- Film holding by rubber roller enhance stable pulling process.
- Customized machine with total packaging solution is available upon request.
- CE model available

- Please refer shrink tunnel according to product size for shrinking application.
- 5-6 kg/cm<sup>2</sup> filter air is self-prepared by buyer.

## Specifications

Model	TY-700-300H
Machine (mm) L x W x H	3030 x 1740 x 1650mm
Package Range(mm) L x W x H	L:250-600mm
	W:200-400mm
	H:120-300mm
Speed	1-15 packs/min
Air consumption	230L/min
Power	220V/60Hz/1 phase (upon request)
Power consumption	2.6KW
Optional Device/Function:	
Anti-cut function, 3 in 1 blade(for PE film), Stainless steel frame...etc., other requirement available upon request.	
*Other packaging size available upon request.	
*the speed will be differ from product size, film thickness & operator.	
*one option on max. product length, width or height while packaging.
