

Semi-automatic Rotary Labeling Machine SBM-SALMR30

Semi-automatic rotary labeling machine (including display screen) belongs to semi-automatic labeling machine, which is suitable for labeling cylindrical, conical bottles, square bottles, hexagonal bottles, flat bottles and other products on one or two sides. It can realize full circle / half circle labeling, circumferential front and back labeling, and the space between front and back labels can be adjusted at will. It is widely used in food, cosmetics, chemical industry, medicine and other industries.

Features:

- Easy handling and operation
- Fast and tool-free changeover to other formats
- Precise labeling
- Subsequent integration of printing units
- It supports labeling of conical bottles and has taper adjustment knob, which can meet labeling requirements of conical bottles by simple adjustment
- Stable performance. PLC and optical fiber sensor control system, support 7 * 24 hours long time work.
- Made to last. in strict compliance with Good Manufacturing Practices (GMP) standards, the semi-automatic wrap-around labeling machine is made of 304 stainless steel and anodized aluminum, and carefully treated to guard against the effects of harsher environments. This durability translates into a solid choice for labeling machine longevity.

Technical Info

Model	SBM-SALMR30
Labeling Speed	15-20 pcs per min (labeling speed is related to product size)
Labeling Accuracy	±0.5mm (excluding product and label error)
Product size	Customized according to customers' products
Label Size(WxL)	Customized according to customers' label
Power supply	AC 220v, 60Hz, or Optional
Power	Approx. 80w
Air Consumption	0.6 Mpa
Dimension(LxWxH)	Approx. 850×580×900mm
Machine Weight	Approx.70kg
