

JS-220H Automatic Small Syrup Bee Honey Spoon Filling Sealing Machine

The automatic honey spoon filling machine is suitable for filling a variety of liquid materials, such as honey, syrup, jam, condensed milk, etc.

Feature

1. Adopt intelligent PLC control, color touch screen to set machine parameters, easy to operate.
2. High-precision piston pump is used to measure and fill honey, and the measurement error can reach $\pm 1\%$.
3. Using PID temperature controller, the temperature control is more accurate, and it is suitable for all kinds of sealing materials.
4. The spoon mold can be replaced, and the specifications of spoons of different sizes can be quickly changed.
5. Compact structure, long service life of parts, convenient maintenance, safe and reliable, simple operation.

Specification

Filling Head Number	1 filling head	2 filling heads	4 filling heads
Production Capacity	800-1000 cups/hour	1800-2000 cups/hour	3200-4000 cups/hour
Filling Range	3-15ml	3-15ml	3-15ml
Machine Size	1250(L)*1300(W)*1750(H) mm	1400(L)*1500(W)*1750(H) mm	3000(L)*650(W)*1700(H)mm
Voltage	220V, 50/60HZ	220V, 50/60HZ	220V, 50/60HZ
Power	2.2Kw	2.4Kw	3.5Kw
Machine Weight	400KG	500KG	700KG
Air Pressure	0.6-0.8Mpa	0.6-0.8Mpa	0.6-0.8Mpa
