

SED-BTB-D Semi Automatic Round Bottle Sticker Labeling Machine

Adopting domestic measuring optoelectronics, circuit board control to carry out labeling, labeling and labeling, use rubber rollers to press the bottle to rotate the self-adhesive label along with the bottle and stick it on the bottle.

Feature

- 1) The labeling bottle can be adjusted before and after to meet the labeling needs of different workpieces;
- 2) Well labeling effect, no bubbles, no wrinkles, high grade, and increase product competitiveness;
- 3) Electronic components such as brand sensors are selected, and the performance is extremely stable;
- 4) Modular design, easy maintenance and low maintenance cost.

Products Parameters

Labeling speed	40bottles/min (customized)
Accuracy	±1mm
Bottle body diameter	Φ10-150mm
Label roll size	Outer diameter:≤φ200mm Inter diameter: φ75mm
Label size	W: 10-130mm L:10-150mm
Power supply	>220 V,50HZ 110V60HZ
Motor power	120w 150W
Dimension(L*W*H)	650*450*450mm
Weight	20kg
