

SED-ZXT PreFilled Syringes Automatic Labeling Machine

This machine is suitable for labeling full or semi-circular surfaces, especially on small-diameter protruding parts that cannot stand on their own. A thermal printer can be used to add data and batch numbers, if needed. This automatic syringe labeling machine is suitable for labeling small tubes.

Advantages of Labeling Machine

1. Suitable for oral liquid, injection, solid glue, batteries, and small and can't stand diameter circular objects the circumference of a circle and a half circle labeling
2. Advanced affinity man-machine interface system, easy operation, complete function, has the rich online help function
3. Special tilting feeding roller conveyor design, the paste item automatic positioning
4. Automatic photoelectric detection, it has without label no stick and without label automatic correction or alarm automatic detection function, to prevent leakage and waste
5. The machine structure is simple, compact, easy to operation and maintenance
6. The machine adopts famous brand motor drive, the feeding label speed stability, reliability
7. LCD touch screen control panel with easy operation;
8. Installed with parameter setting function to reduce labor power;
9. Malfunction self-testing and display with alarm;
10. Automatic stop when label breaks down or runs out;
11. All components are precisely processed by CNC to ensure high quality;
12. High labeling accuracy, long-time using.

Product Parameters

Machine speed	2000~3600 pcs/hour (Based on 1.0ml syringe)
Plunger Accuracy	≥99.5%
Broken rate	0
Plunger missing rate	0
Power supply	380v 50Hz
Power	2kw
Machine Weight	645kg
Overall Dimension	1300L×1300W×1800H
