

SED-1FGJ Stainless Steel Pharmaceutical Powder Filling And Capping Machine

SED-1FGJ series Automatic Powder Filling Machine is suitable for filling powder materials in food, pharmaceuticals and daily goods industries, for example, the milk powder, glucose, protein powder, cocoa powder, coffee powder, rice powder, solid beverages and some finest materials.

The frame of this whole machine is made up of stainless steel and the motors, cylinders, electrical components, pneumatic components and other parts also use the materials from renowned bands, which are suitable for the process of food, pharmaceuticals and chemical corrosive raw materials. Besides, the customers can choose some specific brands for certain parts and assembly.

The machine is equipped with a dust collection device, so there is no dust contamination in the shop. In addition, the residue powder is easy to clean, which can be rinsed by water.

It counts in a vibration manner, so it can accurately count the material that is packed and has even dense, in line with the measurement standard.

This equipment is designed and developed according to national GMP requirements. It also can be combined with other equipment to form a production line, for example, the unscrambling machine, cap pressing machine, labeling machine and etc.

Product Parameters

Model	SED-1FGJ
Production Capacity	1-20 bottles/minute (based on bottle size)
Applicable Specifications	Customizable
Number of Filling Nozzle	One
Counting Error	±1% (based on current machine)
Power Supply	Customizable
Power	2.6KW
WEIGHT	≈470KG(based on current machine)
