

## *FZH 500 Powder Mixer Pharmaceutical*

### Features

- **Easy Maintenance:** The inner wall is designed for easy cleaning, and the manufacturing process occurs in a sealed space, eliminating dust and meeting GMP standards.
- **High Mixing Uniformity:** Achieves a mixing uniformity of 99%, with a load capacity ranging between 50% and 80%.
- **Customizable Settings:** Offers time and speed setting options to accommodate various production needs.
- **User-Friendly Design:** Features an anti-misoperation panel that is easy to disassemble and clean, enhancing usability and maintenance.

### Specifications

|                         |                                                                            |
|-------------------------|----------------------------------------------------------------------------|
| <b>Mixer Type:</b>      | Planetary mixer                                                            |
| <b>Weight(KG):</b>      | 500-5000KG                                                                 |
| <b>Power (kW):</b>      | 2.2 KW                                                                     |
| <b>Warranty Period:</b> | 5 year                                                                     |
| <b>Core Components:</b> | Motors, Gears, Pressure Vessels, Gearboxes, Pumps, PLCs, Bearings, Engines |
| <b>Material:</b>        | SUS304, SUS304L, SUS316, SUS316L                                           |
| <b>Application:</b>     | Powder                                                                     |
| <b>Material:</b>        | Stainless steel                                                            |
| <b>Power Supply:</b>    | 2.2-37kw                                                                   |
| <b>Cylinder Volume:</b> | 100L                                                                       |
| <b>Net Load:</b>        | 100-5000 Kg                                                                |
