

Two steps powder auger auto-filling packaging machine DC-338A3

Features:

This machine adopts servo motor and advanced industrial computer control system. With the interactivity between users and the machine, it can achieve wide-range adjustments of pouch's size and capacity as well as the packing speed conveniently and precisely. With two heating-rolls, it can achieve three edging or four edging sealing for non-free flowing powder.

SPECIFICATIONS:

Width	Length	Speed	Volume	Sealing steps	Electric power	Weight
30-90mm	30-160mm	60-150 pec/min	1-50ml	1 step	2KW/ AC380V	350KG
