

VCY-8 Automatic Chuck Capping Machine

VCY-8 Automatic Chuck Capping Machine is special designed for cylinder bottles. It uses plastic inner cap and outer cap for capping. The max capping speed can reach 100 bottles/min.

Features:

1. It can suitable for recovery bottles
2. The performance is stably, operation is convenient.
3. The device is reasonable with high automation capacity. The cap has special device for remove the reverse caps.
4. The cap has special device for remove the reverse caps.

Technique Parameter:

Numbers of manipulator	8 heads
Container size Range	Φ40mm-Φ100mm
Container Height	80mm-280mm
Production Capacity	≤6000 Bottles/hour
Suitable Cap size rang	Diameter: Φ17mm-Φ35mm Φ12mm-Φ35mm
Suitable Cap Height	10mm-30mm
Power supply	AC 220V; 50HZ (Or according to client voltage requirement)
Power	3KW
Machine Dimension (L×W×H)	2000mm×1100mm×2200mm
Vacuum source	6.67×10 ⁻² Pa Air-drawing speed:15L/S
