

Semi Automatic Vertical Round Bottle Labeling Machine YS-130

Product information:

1. Imported electromagnetic clutch and high precision
2. Advanced anodizing aluminum alloy, longer life.
3. The motor of vertical bottle labeling machine can meet the heavy load, long time operation.
4. All spare parts and standard adopt stainless steel material.
5. PLC control, human-machine interface control panel more fashionable
6. Import inspection standard optical coupling, to guarantee the high precision accuracy.
7. This vertical bottle labeling machine suits for round bottles, double label or more labels
8. Can equipped with date printer
9. Application: vertical bottle labeling machine is suitable for variety of round bottle container, double label round bottle, multi label round bottle labeling and printing, such as: glass bottle, plastic bottles, tins etc.

Technical introduction:

Model	YS-130
Voltage	AC220V/50HZ 150W
Label size	Max: 120(W)*400(L)mm Min:10(W)*30(L)mm
Round bottle size	Max: 125mm Min: 20mm
Label inner core dimension	Inner diameter: 75mm outside diameter:300mm
Dimension	580*680*860mm
Net weight	45kg (include coding machine)
