

Auto Capsule Powder Filling Machine KF-series

Feature:

- Hard Capsule Filling machine simultaneously fills powder, pellets and tablets into capsule
- The Convenient Operation Panel. The functional switches and signals are integrated in touch screen to make it possible that machine is convenient operated.
- The 6-station powder dosing system works with the tamping pin principle and consists of 5 tamping stations and one transfer station.
- Tamping pin groups can be easily adjusted for accurate powder filling.
- A level sensing device checks the powder level above the dosing plate and controls the powder feed from the supply hopper.
- Non separated capsules are automatically rejected by faulty capsule reject system.
- Easy size change with interchangeable size parts.
- Low noise and vibration can be guaranteed by increased high torque index and accuracy mechanical cam.
- Variable speed control enables the machine to soft start by inverter.

Specifications:

Model	KF45N	KF90N	KF100N
Max. Capsules/hr	45	90	105
Capsule Size	#00, 0, 1, 2, 3, 4	#00, 0, 1, 2, 3, 4	#00,0,1,2,3,4
Powder consumption	1.5	2.2	2.2
Electricity	220/380 volt, 3 P, 50/60Hz	220/380 volt, 3 P, 50/60Hz	220/380volt,3P,50/60Hz
Demension (WxDxH mm)	1,100×1,150×2,150	1,356×1,323×2,140	1,356×1,323×2,140
Weight (kg)	1,1	1,6	1,6
