

## Round Container Labeling Machine SL-4114

### Features:

1. The machine is applicable to circle label for round bottles at medicine, cosmetic industry etc.
2. The structure of roller rubbing labels is the best characteristic of this machine, so it is very precise and high-speed. In the past the machine adopted the belt structure to rub the label. Because in the course of belt running the phenomenon of deflection appears often, so it influences the precision of labeling. But the roller structure eliminates the inaccurate phenomenon.
3. The structure is so concise that it is easy to operate and repair for worker
4. No change parts are required for different bottle sizes because the detaching set is all-purpose.
5. Serve motor drives the labeling head, so maximum labeling speed is 60 meter per minute.
6. Advanced and kind human interface, and the on-line helping system.

### Parameters:

- producing speed: Max 500p/min
- labeling accuracy:  $\pm 0.5$ mm
- label max width: 100mm( can be raised according to the require)
- bottle diameter:  $\phi 20$ - $\phi 80$ mm
- label inner diameter :  $\phi 76$ mm
- label outer diameter: Max $\phi 350$ mm
- outline size: 1520x700x1400(mm)
- using power: 220V 50Hz 1000W
