BM-660 Automatic Square / Round Bottle Double Sided Adhesive Labeling Machine

This double sides adhesive labeling machine suitable for the symmetry and non-symmetry containers of wine, foods, cosmetic and label double-faced stickers on the shapes of flat, square, oval, cylinder and other anomalistic containers.

Features and performance:

The machine are adopted the touching display operation, easy and intuitive, fully function. Adopted Siemens control system, make machine more stable, reliable in operation and long working time.

Fittings selection:

Transparent label sensor, synchronous hot coding printer, thermal transfer machine, ink jet printing machine.

Description:

1) Heavy-duty construction utilizes oversized drive components combined with an aluminum and stainless-steel base frame for years of dependable service.
2) Various product infeed systems are available that provide precise product spacing and orientation. It can be used stand alone or integrated in-line and matching filling equipment speeds.
3) Advanced high torque micro-stepping driven applicators include ratio-offset and speed-following capability for accurate and reliable application of a wide variety of label materials.

4) Designed for the application of front and/or back panel labels with the capability to label containers that are round, square, oval or rectangular.

Technical Parameter:

Item	Parameter date
Main Material	Stainless Steel 304, Aluminum Alloy 6061
Dimension	L 2500mm * W 1300mm * H 1400mm
Voltage	220V/50Hz
Power	1200 W
Production Capacity	5000BPH
Labeling Accuracy	+/- 1mm beak edge
Label Roll Core	76 mm
Label Roll Diameter	350 mm
Label Width	10~110 mm (special size can be customized)
Label Length	20~360 mm (special size can be customized)
Bottle Diameter	30~90 mm (special size can be customized)
Bottle Height	30~200 mm (special size can be customized)
