

JDXD-130B Horizontal Automatic Packaging Machine

JDXD-130B Horizontal automatic packaging machine contains motor film-releasing, film forming, bottom sealing, vertical sealing, cutting, pouch opening and filling, pouch transferring and top sealing. The cams on the main shaft finish the coordinated action driven by the motor and the encoder on the main shaft feedback the position single. Under the control of the PLC, it realizes the function of film roll→film forming→film in-shape→powder filling→sealing→ finished products transferring. At last, the finished products will be manually put into boxes or cartons. The machine designs properly with a beautiful appearance. It adapts standard stripe sealing. It can realize automatic powder, granule, SC, EC, AS filling with changing the filling device. The whole machine uses SUS304 which has the feature of perfect anti-corrosion. The organic glass cover can prevent the flowing of dust which is more environmental-friendly.

Technology Parameter

- Capacity : ≤60 pouches/min
- Pouch Size : Width: 60-130mm, Height: 80-180mm
- Volume : 200ml
- Precision : ±1%
- Inner Diameter : Φ70-80mm
- Outer Diameter : ≤Φ500mm
- Air Pressure : 0.5-0.7MPA
- Power Source : Three Phase AC380V、50HZ
- Power : 3.5KW
- External Dimension : 2580×945×1550mm (L×W×H)
- Weight : 1350KG
