

## Tube Labeling Machine SBHSL-60

Tube Labelling Machine adopts advanced technology and high-powered components—small inertia stepper motor to reach the real perfect labelling. The system carries out high response and highly reliability by the professional approved program controller and stepper system, it carries out communication between machine and man by micro processor control panel, the precision of the main machine can during the process of the sending label control.

This model is suitable for various dia. tubes i.e. 19 mm to 60 mm. The machine operates at the speed up to 60 tubes / min. Automatic feeding & air ejection system can also be provided for loading and un-loading of tubes. The machine comes with salient features like No tube – No label. Transparent film label can also be applied without eye – mark with the help of mechanical sensor.

### Technical Specification:

Model	SBHSL-60
Label speed	Up to 60 tubes/min
Label accuracy	±1mm
Label Length (Max.)	150mm
Label width (Max.)	90 mm (H)
Tube diameter (Max.)	φ65mm
Tube diameter (Min.)	φ19mm
Tube length (Max.)	220mm
Label Reel Core Diameter	φ76.2mm
Power	220V 50Hz 3000W
Weight	300 kgs
