

DXD-350F Automatic Powder Sachet Packing Machine

It is suitable for automatic packing of loose nonstick, thick powder products in pharmaceutical, food, chemical industry, such as instant drink, milk powder, MSG, white sugar, instant coffee powder, flour, powder additive, talcum powder, veterinary powder, confinement powder and etc.

Features:

1. This machine has been adopted a PLC program controller and provided with an English displayer. Thus, this equipment is easy to operate and convenient adjustment, with high automation.
2. The advanced digital photo electricity bag-making system can make the length of bag set directly at the operation bench. When you are using the materials with color mark, the first bag can catch the color mark, which can obtain accurate color mark and pattern. The synchronous bag pulling system can make bag pulling steady and accurate.
3. Touch screen English displayer operation panel, digital inputting and displaying, sealing, insulating high corrosion-resisting and easy operation.

Technical Parameters:

packing speed	10-30bags/min
dosing range	(50-500g)
bag making lenth	100-240mm
bag making width	80-180mm
bag type	three side sealing, pillow sealing
compressed air	0.12m3/min
capacity	
power supply	220V,50Hz,single phase
total power	1.8Kw
weight	350kg
dimension	L800xW1000xH2200
