

Semi Automatic Round Bottle Labeling Machine CY-110

It is suitable for all kinds of cylindrical objects and small taper round bottles, such as xylitol bottles, cosmetic round bottles and wine bottles. It can realize full cover/ half cover labeling, front and back labeling, and the distance between positive and negative labels can be adjusted arbitrarily.

Circumferential location detection device can be optional to realize circumferential location labeling.

It can be equipped with color tape printer and ink-jet printer, which can print production batch number and other information at the same time to reduce packaging process and improve production efficiency. Widely used in food, cosmetics, chemical, pharmaceutical and other industries.

Technical Details

| Model | CY-110 |
|-----------------------------|--|
| Label stop accuracy | 0.02" ($\pm 0.5\text{mm}$) |
| Production speed | 20-40 pcs/min |
| Product diameter | $\Phi 0.59\text{''} \sim 2.36\text{''}$ ($\Phi 15\text{mm} \sim \Phi 60\text{mm}$) |
| Label length | 0.59" ~ 5.11" (15mm ~ 130mm) |
| Label roll inside diameter | $\Phi 2.99\text{''}$ (76mm) |
| Label roll outside diameter | $\Phi 11.02\text{''}$ (280mm) |
| Voltage | 110V~220V (with a transformer) |
