

LG YF-2000AX Automatic Continuous Induction Cap Sealing Machine

Automatic induction cap sealing machine is a continuous induction cap sealing machine or hermetic sealing machine which provides leak proof seal, product tamper evidence made of high quality stainless steel material. It has induction sealing capacity from smallest to large lid diameter caps as per customer requirement. Diameter of caps from 20mm to 130 mm diameter caps can be done without any change over parts and can be wheeled easily from one place to another further height and level adjustment is very easily done in this machine.

Features

- Automatic Induction sealing machine front has a control panel with easy to operate switches.
- Machine is easily movable from one place to another by attached wheels.
- All safety features provided in the machine for short circuits, overload, temperature cutoff/on, conveyor stops automatic when no bottles /sealing off/bottle jam.

Technical Specification

Model	LG YF-2000AX
Power	220V, 50/60Hz
Sealing Diameter	20 mm to 130 mm
Machine Weight	72 Kg
Machine size	1550 mm X 550mm X 1350mm
