

Automatic Capsule Filling Machine NJP-1200

The NJP-1200 is a filling and closing machine for hard gelatin capsules. The machine is suitable for a wide variety of even the most difficult products. Due to its modular structure the machine can fill capsules with powder and pellets in different combinations.

The machine has a small footprint, cleaning and size change can be effected fast and easy. Operation is uncomplicated, effected via the touch screen of the integrated control cabinet.

Technical Parameters:

Model	NJP-1200
Output	72000C apsules/hour
Machine weight	11 00Kg
Machine Dimensions	960×100 0×190 0
Power Supply	380/220V 50Hz
Motor power	5.5 kw
No.of segment bores	9
Vacuum	40m ³ /h-0.04-0.08M pa
Dust	24.5Kpa 210m ³ /h
Noise	<75 DB(A)
Making rate	Empty capsule99.9% Full capsule over99.5%
Suitable for Capsule	00,0,1,2,3,4,5#
Filling error	±3%- ±4%
