

## Automatic Tube Filling Machine QGGF- 60Z- C

QGGF-60Z-C Automatic Tube Filling & Sealing Machine applies for production in cosmetic, light industry (daily use industrial goods), pharmaceutical and food industry etc. It can fill material such as grease, ointment, gel and sticky fluidextract into tube, then seal the tube end, stamp number and discharge finished product.

Technical parameter:

| Model                   | QGGF-60Z-C               |
|-------------------------|--------------------------|
| Usage                   | Metal tube               |
| Working Capacity        | 30-60 pieces per minutes |
| Filling Volume          | 2-80ml                   |
| Filling Error           | $\leq \pm 0.5\%$         |
| Tube Diameter           | 12.5-25mm                |
| Tube Length             | 50-160mm                 |
| Working air pressure    | 0.5-0.6MPa               |
| The power of main motor | 1.1kw                    |
| Size                    | 1950×750×1850mm          |
| Weight                  | 900kg                    |
