

LD-K100 Vertical Granule Packing Machine

This machine is a trilateral four edge sealing powder packing machine with a set of bag making, measuring, filling, sealing, batch number and cutting bags in one implementation.

This machine is simple to operate and performs stable with accurate making, beautiful pocket and low noise.

After polishing processing on surface, it looks beautiful. This machine's production speed is stepless and adjustable, ideal choice for all kinds of packaging workshops whether it is small, medium or large.

Main parameters:

- Machine dimension (L×W×H) : 1000×1000×2000(mm)
- Machine weight : 350kg
- Bag making size (L×W) : 180mm×120mm
- Packing volume : 5g-100g
- Filling accuracy : $\leq 30 \pm 1g$ 30-100g $\pm 2g$
- Power supply : AC220V/50Hz
- Power : 1.5KW
- Preparative (air operated) source : 0.6Mpa clean and stable compressed air
- Production capacity : 1800 bags/hour
