

CJXH-1600AT Aerosol Spray Filling Machines

Aerosol Filling Machine is composed of such three parts as: Liquid Filler, Crimper and propellant filling machine (booster pump included). The machine has found widespread application in such fields as pharmacy, healthcare, automobile, environmental protection, fighting and daily chemical, to fill such as mousse, air purifying agent, pesticide, disinfectant, fire extinguishing agent, carburetor cleanser and PU foam filler etc. Production capacity: 500-1000 cans/hr

Machine Introduction:

CJXH-1600AT is a new design automatic aerosol filling on the base of 1600A. It consists of liquid filler, sealing machine, gas filler. Using linear pushing bottle system. It has two working models: manually intermittent filling and automatic intermittent filling, intermittent time is adjustable, very flexible and efficient.

It is widely used in daily chemical, auto-care, household-care, food and pharmaceutical industry. Filling moisture spray, wax board, carburetor cleaner, air freshener, spray paint, butane gas cartridge, propane cans etc.

Our Machines Applications:

HOUSE CARE: air freshener, insecticide, furniture spray, pesticide, leather spray, toilet spray, glass spray.

PERSONAL CARE: perfume, deodorant, hair spray, shaving gel/foam, mouth spray, cosmetic spray, self-defense spray, police spray.

HEALTH CARE: pharmaceutical spray, medical oxygen, inhaler, wound spray, high purity oxygen, food spray.

CAR CARE: tyre repair spray, car windows spray, upholstery spray, engine cleaner spray.

OTHER INDUSTRIES: spray painting, PU foam, LPG cartridge, refrigerant gas, butane gas, fire extinguisher, anti-rust spray, mould release spray.

Technical Parameters

Filling capacity	800-1100 cans/hour
Liquid volume	10-1000ml
Gas volume	10-750ml
Filling accuracy	±1%
Applicable aerosol can diameter	35-65mm
Applicable aerosol can height	70-330mm
Applicable valve	25.4mm(1 inch)
Air source	0.75-0.9Mpa
Max air consumption	1.3m ³ /min
