

## *Vertical Automatic Shampoo Sachet Filling Packing Machine LG-300*

Automatic shampoo sachet packing machine is a perfect filling machine. This filling machine can complete the filling, sealing, cutting and forming operations at the same time. The packaging materials can use various composite packaging materials and are widely used in different life fields.

Shampoo filling machine is suitable for packaging liquid or semi-liquid with certain fluidity and viscosity, such as shampoo, broad bean sauce, vinegar and other products.

### **Features**

1. The machine adopts 201 stainless steel material, and 304 for the parts in contact with stainless steel material, the material has good corrosion resistant effect, can not only ensure the product clean and health, and can greatly prolong the service life of the machine.
2. The machine adopts imported PLC control system, which is equipped with Chinese and English touch screens. The operator can operate directly on the touch screen, which is convenient and fast. And can monitor the production process at any time.
3. This machine can automatically complete measurement, filling, sealing, cutting, printing and other operations, which can effectively reduce production time.
4. It is equipped with color system controller, which can easily get the complete trademark and has good anti-counterfeiting effect.
5. Shampoo filling machine adopts the stepper motor control system. It is convenient and quick to change the product without adjusting other parts.
6. The control system of the machine can automatically choose the best mode to match all operating procedures, so as to ensure the best packaging effect and packaging speed.
7. The packaging performance of the machine is good, and the operation noise is low, and the sealing performance of the packaging products is good.

8. Automatic shampoo sachet packing machine can be applied to a variety of packaging materials, all kinds of complex film, tin foil and other packaging materials can be used.

**Technical Data:**

<b>Model</b>	<b>LG-300</b>
Packing Speed	40-80 bags/min
Bag Size	L:40-140mm W: 20-120mm
Power	1.8 kw/220 v
Packing Film	0.035-0.07mm
Measure Range	10-100ML
Dia. of Rolling Paper	Less than 400 mm
Weight	350 kg
Size	780*920*1680mm
