

BD150M Automatic Sleeve Underlapping Machine

Bottles bottom edge shrink wrapping machine is used for bottle bottom covered by sleeves film automatically.

For some bottles, the sleeves usually go up while they are shrinking in steam or electrical heating tunnel. To avoid this problem we need the fix the sleeves at the edge of bottle bottom first. This machine does this job. It is suitable to round square, flat, curved bottles with good effect.

Parameters:

Machine sizes	1730mm(L)*550mm(W)*1500mm(H)
Gross weight	250kgs
Power of conveyor motor	0.75kw
Power of motor for leather belt	0.4kw
Power of heating unit	3.4KW~5kw
