

Automatic Spout Pouch Filling Capping Machine for Juice, Sauce, Chocolate Spread FP-ZLD2000

The stand spouted pouch packing machine consists of pouch supply, filling, cap supply, cap sorting, capping parts, fully automatic. Which is applied for filling different kinds of liquid, semi-liquid. Such as juice yogurt, water, jelly, soy milk, cooking oil, liquid soap etc. tomato sauce, Jam, chocolate spread etc.

Feature:

1. Model FP-ZLD2000 is spouted pouch filling capping machine.
2. It is widely applied in different products such as juice yogurt, water, jelly, soy milk, cooking oil, liquid soap etc. Also used for the semi fluid, example tomato sauce, Jam, chocolate spread etc.
3. Fully automatic pouch supply, filling, cap supply, cap sorting, capping.
4. It with 2 filling nozzles max packing speed 2000 bags/hour.
5. International spare parts brand that ensures stable performance.
6. Easy operate by touch-sensitive screen, PLC and electric control system
7. High quality and performance, the frame is made of 150mm thickness 304# stainless steel.
8. Jacket hopper with agitator to keep the material fluid inside machine.
9. Special designed non-drip filling nozzle to prevent dripping.
10. No bag – no filling- no sealing.

SPECIFICATIONS:

MODEL	FP-ZLD2000
Equipment Structure	Automatic filling capping machine
Equipment Material	304 stainless steel
Measurement Way	Piston measurement
Operation Interface	Touch screen
Applicable product	Viscous liquid products
Packaging bag material	Complex film
Packaging bag size	Width: 180mm-300mm
Working process	Step 1: Supplying premade bags
	Step 2: Filling
	Step 3. cap loading
	Step 4: cap screwing
Product weight	20g
Measure hopper capacity	≥20KG
Packaging speed	2000 pcs/hr. based on 20g chocolate spread
Equipment weight	650KG
Equipment Size	2420×1520×1560mm (L*W*H)
Working Power	1.5KW
Air Consumption	0.8 m ³ /min
