

Candy Packing Machine DXD-1200

Applications:

The flow type candy packing machine suits use for packing single pieces of candy and similar products.

Main Features:

A. Safety

RezPack flow type candy packing machine has safety operation, with the help of automatic error display, safety shield and safety switch.

B. Intelligent zed control

This packing machine comes with an intelligent zed control system, which can store more than 100 pcs of parameter information. The touch screen displays operation indication, error signal and quantity, and is easy to operate.

C. High efficiency

The flow type packing machine has high speed and packing efficiency. With an empty bag remover, the candy packing machine offers minimum empty bags. The use of double shaft device helps reduce time to stop the machine.

D. Long service time

The spare parts are easy to change, and the complete mechanism is designed to have long service life.

E. Low noise

The flow type candy packing machine makes use of synchronization belt, which has low noise.

Main Specifications:

Machine Name	Flow Type Candy Packing Machine
Model	DXD-1200
Capacity	1200 pcs/min
Packing Spec.	Length12-40mm Width12-30mm Height5-18mm
Length of Finished bag	50-80mm
Candy Shape	Square, Ellipse, Oblate, Globular, Plum Blossom-Shaped
Gross Power	4 Kw
Overall Dimensions	3300*1350*1560mm
Gross Weight	1400kg
Power Supply	220V 50Hz
Packing Materials	OPP, CPP, PET Metallized film, Al-plastic film, Paper-rubber complex
