

KR Series Bottle Rinsing, Filling and Capping Line

Based on absorbing advanced technology from home and abroad, we designed this line with the multi functions of rinsing, filling and capping. It is widely used in filling various kinds of liquid, such as carbonated drinks, beverage, sauce, vinegar, fruit jam, mineral water, and purified water. This machine is specially designed, completely functioned, and easily operated and highly robotic zed, and regarded as the reasonable filling equipment.

TECHNICAL PARAMETERS

1. Main machine adopts PCL programmable control, speed adjusted by frequency conversion.
2. Change bottle size easily.
3. Material circling system controlled in constant temperature.
4. Pressure filling, liquid surface fix seat, and accurately fix capacity
5. Empty bottle turning around 180 degree automatically, and rinsing in and out.
6. Adjustable magnetic force square screwing cap, to ensure just all right screwing and not destroy cap.
7. Nice appearance and low noise.
8. Make function trouble calling device

主要技术参数 Main Technical parameters

产品型号: Modle	KR-16-12-4	KR-18-18-6	KR-24-24-8
生产能力 Working efficiency	3000瓶/小时 (500ml) 3000b/h(500ml)	8000瓶/时 (500ml) 8000b/h(500ml)	12000瓶/时 (500ml) 12000b/h(500ml)
灌装温度 Filling temperature	90℃、常温 90C、normal Temperature	90℃、常温 90℃、normal Temperature	90℃、常温 90℃、normal Temperature
灌装精度 Filling precision	±2%	±2%	±2%
功率 Power	3KW	3KW	3KW
额定电压 Rated voltage	380V	380V	380V
灌装方式 Filling way	微压 Low pressure	微压 Low pressure	微压 Low pressure
外形尺寸 Dimention	2200x1610x2450mm	2750x2050x2450mm	3050x2250x2450mm
设备重量 Weight	2.5T	3.6T	4.5T
