

BF2000 Candy Depositing Line

BF2000 Candy Depositing Line can make hard candy and toffee. This machine can do single color, two layer double color, center filling striped candy and so on. Unique design and continuous innovations maximize the output capacity, and allow the complete control of the whole process. The processing line is a compact unit which can continuously produce various kinds of hard candies under a strict sanitary condition. It is also ideal equipment which can produce out good quality products with the saving of both the manpower and the space occupied.

Function:

- Continuous Vacuum cooking, automatic control temperature.
- High transparent, easy to operate.
- It can equip with Quantitative filling mixing device like color, essence, acid liquid.

Standard Specifications:

- Production Capacity(5g candy)(kg/h): 360;
- Power consumption(cooker)(kw): 16;
- Power consumption(depositor) (kw): 14;
- Consumption of Compressed Air(m³/min): 0.5;
- Pressure of Compressed Air(Mpa): P=0.4-0.6;
- Steam consumption(kg/h): 450;
- Steam pressure(Mpa): P=0.6-0.8;
- Water consumption(L/h): 2200;
- Area for the Machine(m):13X2X2.7;
- Weight of Machine(Tons):6;
