

Powder VFFS ZV-420D/ZV-520D/ZV-720D

The equipment is redesigned according to market development needs, combined with the practice on the basis of the development and design, in line with national GMP standard the machine fusion concept of European packaging science and technology, the latest technology, design more reasonable and concise and more solid automatically feed tank filling, etc. Suitable for filling powder and granule materials, such as solid drink grape, milk powder, spices, etc

This machine adopts disc positioning filling, manipulator hanging cover rolling, stable and reliable, high precision of more than 99%, the machine adopts imported from Japan for the high precision closed type cam position device, high precision, reliable operation, long service life. The protractor has the advantages of simple structure, long-term use without maintenance.

Application: coffee powder, milk powder, flour powder, spice powder, detergent powder, chili powder, masala powder, cocoa powder, baking powder, bleaching powder, chicken powder. It integrates metering, bagging, packing, sealing, date printing and counting into one.

Features:

- High precision digital weighing sensors;
- PLC control system ,stable and reliable;
- 5.7inch colorful touch screen, easy to operation;
- Material contact parts (storage hopper, hopper, vibration plate, weighing hopper, etc.) are to realize fast disassembly, easy to clean;
- Easy to clean and maintance.

Specification:

Model	ZV-420D	ZV-520D	ZV-720D
Film Width	Max.420mm	Max.520mm	Max.720mm
Bag Length	80-300mm	80-350mm	180-500mm
Bag Width	60-200mm	100-250mm	100-350mm
Film Roll Diameter	max.320mm	max.320mm	max.320mm
Packaging Speed	10-60bags/min	10-60bags/min	5-55bags/min
Power	220V 50/60Hz 2KW	220V 50/60Hz 3KW	220V 50/60Hz 3KW
Machine Weight	about 650kg	about 680kg	about 750kg
