

XT-FGJ100C1 Semi-Automatic Can Body Non-Rotary Can Sealing Machine

1. Seaming rollers are made of stainless steel 304# with high hardness, rust-proof and excellent sealing performance.
2. Can body non rotary when seaming, suitable for liquid and other material easy to fall out or broken.
3. All electrical components adopt well-known high-end parts which have stable and reliable performance.
4. Suitable to seal various round tin cans, aluminum cans, paper cans and PET cans, it is an ideal equipment of food, beverage, pharmaceutical and other industries.

Product Details:

- Material: Stainless steel
- Qty of sealing head : 1
- Sealing speed: 15-20pcs/min. (depending on worker's proficiency)
- Sealing height: 50-200mm (shall be customized in case of exceeding 200mm)
- Dia. of applicable bottle type: 50-126mm
- Working voltage: AC220V 50/60Hz
- Electricity power: 0.55KW
- Weight: 130KG
- Dimension: 400(L)* 600(W)*1450mm.
- Payment terms: TT (30% before production, 70% before shipment)
