

ZK-Q1 Intelligent Vacuum Packaging Machine

- Using Omron PLC centralized control, intelligent control weighing, filling, hexahedral shaping, vacuum pumping, sealing, discharging and conveying the whole process, real-time tracking system working state, friendly man-machine interface, simple operation;
- Servo motor drive, precise positioning, fast moving speed;
- Two-sided vacuum packaging, which greatly reduces the packaging cost;
- Imported pneumatic components are widely used. They are simple in structure, reliable in operation and easy to maintain;
- Replacement of die is simple, convenient and fast;
- Reasonable operating space, bagging and sealing only need on man-made;
- Fault display and online help system.

Technical Parameters:

Model	Rated Packing Weight(kg)	Packing speed (bags/h)	Packing accuracy	Power	Air
ZK-Q1	12.5-25	mini140	x(0.2)	AC380V 50HZ 3KW	0.4-0.8Mpa,1.72m ³ /h
