

Sakos Machinery

Water Liquid Filling Machine CGF-series

Main Features

- 1) This bottling machine is mainly used for washing, filling and capping PET bottle which can fill non- carbonated drinks such as mineral water, pure water, wine and so on.
- 2) Bottle washing, filling and capping are achieved in one machine.
- 3) The contact time is shorten between material and the outside. And improved the health conditions, production capacity and economic benefits.
- 4) CGF series bottling machine adopts hanging type conveying-bottle structure to make changing bottle mold more convenient, faster and more laborsaving.
- 5) The main machine adopts advanced PLC control technology. The key electric elements adopt Mitsubishi, Omron, Siemens, etc international famous products.

Pre-Sales Service

- * Inquiry and consulting support.
- * Sample testing support.
- * View our Factory.

After-Sales Service

- * Training how to install the machine, training how to use the machine.
- * Engineers available to service machinery overseas.

Technical Parameters:

| Model | CGF8-8-3 | CGF18-18-6 | CGF24-24-8 | CGF32-32-12 | CGF40-40-12 |
|---------------------|------------------|----------------|----------------|----------------|----------------|
| Capacity(500ml) | 2000 | 6000 | 10000 | 14000 | 17000 |
| Bottle height(mm) | 150-340 | | | | |
| Bottle diameter(mm) | φ50-φ110 | | | | |
| Filling temperature | Room temperature | | | | |
| Power(kw) | 2.5 | 3.1 | 3.8 | 5.6 | 7.6 |
| Overall size(mm) | 2000×1500×2200 | 2400×1830×2400 | 3100×2200×2400 | 3800×2500×2400 | 4000×2800×2400 |
