

Sachet Tea Bag Packing Machine With String And Tag LGYD-169

Tea sachet packing machine is a new type of packing machine. The machine is used in many industries. It is widely used for packaging tea, herbal tea, health tea and other small particles in bags.

The working principle of rotating packing is the basic principle of filling and sealing of products by machines. This principle makes the packaging of products more convenient and fast, and can effectively improve the company's production efficiency. As an automatic machine, tea bag packing machine with string can complete automatic sealing, filling, film cutting and other work.

Structure Features Of Tea Bag With String And Tag Packing Machine

1. The tea sachet packing machine adopts a color touch screen and a PLC control with stable and reliable two-axis high-precision output.
2. Under the control of the system, the processes of bag making, metering, filling, sealing, coding, and bag cutting can be completed in one time.
3. It adopts two independent systems of pneumatic control and circuit control, featuring sensitive operation, low noise and stable performance.
4. It adopts double belt servo die and double servo control, which greatly reduces the generation of resistance. The packaged product is well formed, more beautiful, accurate in size and high precision positioning.

Main Advantage Of Tea Bag With String And Tag Packing Machine

If the company wants to create the maximum benefit for itself within the stipulated time, it is necessary to ensure that its food packaging production line runs well, there will be no errors in the production process, and the mistakes and failures will be avoided as much as possible. Enterprises get the most benefit.

The use of an automatically controlled packaging system can greatly improve production efficiency and product quality, significantly eliminate errors caused by packaging processes and printing labeling, and effectively reduce the labor intensity of employees and reduce energy and resource consumption. The tea sachet packing machine with string is the most advanced and most automated product in the packaging machine.

Technical Data:

Model	LGYD-169
Measuring Range	1-15 g
Inner Bag Size	Length: 50-75 mm Width: 50-75 mm (Can be customized)
Outer Bag Size	Length: 85-120 mm Width: 75-95 mm (Can be customized)
Label Size	25*25(Can be customized)
Power	3.7 kw
Weight	650kg
Size	1050*700*1300 mm
