

Coffee Filling Machine SB1000K

Coffee Filling Machine is suited for various granule in food filling from 100~1000ml measured by cups volume method. adjustable setting of cups number and no limit filling amount. According with the heath standard material contact parts made in SS304.

Feature

- A. Dual sensor control, flexible bag length cutting.
- B. Man-machine operation, convenient and quick parameter setting.
- C. Self-diagnosis function, faults can be clearly displayed.
- D. High-sensitivity photoelectric color mark tracking function can accurately seal and cut bags.
- E. Independent PID temperature controller, the coffee filling machine is suitable for various packaging materials.
- F. The drive system is simple, reliable in performance and convenient in maintenance.
- G. All controls are realized by software, which is convenient for function adjustment and upgrade.

Purpose:

granule kind filling: sugar, coffee, bean, tea, rice, etc.

Technical parameter:

Pack speed	20-50 bag/min
Filling capacity	100-1000ml
Consumtion power	0.86kw/220
Dimension	940mm*877mm*1700mm
Weight	188kg
