

KV-200XGC Premade Pouch Rotary Packaging Machine with Multi-head Scale

Features

- 8 stations, single bag
- Pillow bag capabilities only
- Servo-driven control platform
- PLC control with touch screen operation
- Highly durable welded steel frame
- Production parameter memory including gripper size, machine speed, sealing temperature, and filling volume
- Pouch presence detection – no filling, no sealing
- Automatic to exhaust the air
- Two step sealing process guarantees clean sealing

Application

The KV-200XGC rotary packaging machine with multi-head scale can be applied to the packaging of various granular materials, such as peanuts, puffed food, dried fruit, etc.

Technical Parameters:

Model	KV-200XGC
Packaging Speed	Max. 40bags/min
Bag Width	100mm-200mm
Bag Length	80mm-310mm
Bag Type	All kinds of premade pouch
