

Ketchup Filling Machine FFC-4A

The multi-head piston type automatic filling machine is a new-generation automatic filling machine developed by our company with many years of production experience and self-developed by the world's advanced technology. It adopts the principle of piston type quantification. The electrical and pneumatic components are selected from world famous brands. The PLC is controlled by human-machine interface. It has novel design, beautiful appearance, friendly interface, strong adaptability, simple operation, accurate filling and convenient maintenance. . It is widely used in the filling of various liquids, viscous bodies and pastes, replacing the filling valve (that is, it becomes a multi-head thick sauce automatic filling machine), and can also fill the semi-fluid, paste and sauce containing particles.

1. Using world-renowned brands of electrical and pneumatic components, low failure rate, reliable performance and long service life.
2. High-strength stainless steel frame, easy to assemble and disassemble, easy to clean, in line with GMP requirements
3. The filling amount and filling speed are easily adjusted, operated and displayed by the touch screen, and the appearance is beautiful;
4. There is no bottle filling function, and the liquid level is automatically controlled to feed;
5. Quickly adjust bottles of various shapes and sizes without replacing parts;
6. The filling head is equipped with special anti-leakage device, which has no drawing or dripping.

Note: Filling range and speed can be designed according to user needs.

Technical Parameters:

Model	FFC-4A
Filling capacity (ML)	50-1000ml
Filling speed (BPH)	2000 B/H
Power supply (VAC)	220V 380V 50-60Hz
Power (KW)	3.2
Air consumption (MIN)	4KGS×30LITER
Dimensions (MM)	3000x900x1800
Net weight (KG)	600
