

Automatic Shrink Sleeve Labeling Machine

The shrink sleeve labeling machine is most intelligent with operating rapidly and simply for various plastic bottles.

Sleeves made of plastic stretch film can be applied to the slightly rounded area of plastic containers without glue, for they are shrunk with steam or hot air to fit the container shape.

Suitable product: plastic containers in beverage, health, cosmetic, daily consumption fields etc.

Function: Applying the sleeves made of elastic stretch film to the slightly rounded area of plastic containers without glue.

Machine Description: The shrink sleeve labeling machine is most intelligent with operating rapidly and simply for various plastic bottles.

Features:

1. The whole stainless steel structure: stainless steel SUS304, simple structure, good appearance, easy to clean, the whole machine is waterproof does not rust.
2. Unique cutter system: adopting the static cyclotron cut way, labels, cutting a right, without flash, burr.
3. Special label location positioning device: guarantee the accuracy of the set of standard processes label positioning.
4. Adopts the modularization design, module control, precision, high speed of label.
5. Using high quality touch screen operation section, the realization of finger operation, convenient and quick.
6. Whole machine high degree of automation, simple to use, only one person operation, easy maintenance.

Technical Specifications:

Input power	1.8-3 KW
Input voltage	3,240/220VAC
Production efficiency	150-300 bottles/min
Size of host machine	L2300mm×W850mm×H2000mm
Applicable diameter of bottle body	φ28mm-φ125mm
Applicable length of label	30mm-250mm
Applicable thickness of label	0.03mm-0.13mm
Applicable internal diameter of paper tube	5"-10" adjust it at will
