

Weight Checker MK Series

The weight checker is used to determine if a product meets the target weight, weigh materials, counts packs, and automatically rejects unqualified products. Users should choose the right weight checker according to the weighing range.

Features:

- A stepless vibration feeding system ensures a smoother product flow.
- The program is adjustable depending on production conditions.
- 304 stainless steel guarantees food hygiene and safety.

Technical Parameters:

Model		MK-150	MK-210	MK-300	MK-210
Weighing range		≤200g	≤1000g	≤3000g	≤15000g
Weighing accuracy		±0.2g-±0.3g	±0.3g-±1g	±0.5g-±2g	±2g-±10
Minimum		0.1g	0.1g	0.1g	10g
Conveying speed		20-50m/min	20-100m/min	20-90m/min	20-80m/min
Product	Length	≤150mm	≤280mm	≤300mm	≤450mm
	Width	≤140mm	≤200mm	≤290mm	≤390mm
Conveyor belt	Length	200/300mm	400mm	450mm	620mm
	Width	150mm	210mm	300mm	400mm
Rated power		150w	150w	200w	200w
Power supply		AC220V±10% 50HZ(60HZ)	AC220V±10% 50HZ(60HZ)	AC220V±10% 50HZ(60HZ)	AC220V±10% 50HZ(60HZ)
Reject device		Blower /undefinedpusher	Blower /pusher	Blower /pusher	Pusher
