

# Automatic Coffee Capsule Filling and Sealing Machine KFZ - 1

## Main Feature:

- Stable performance, high configuration according to European standard.
- One-click control, real-time monitoring.
- Servo drive and high precision high speed positioning.
- Protective acrylic dust cover.
- High rates of cumulative filling of the servomotor, less than  $\pm 0.1$  grams.
- High productivity of nitrogen flushing, the percentage of nitrogen in a sealed capsule exceeds 95-98%.
- A complete set of Ormon management system, the network system allows for inter-regional and supranational monitoring.
- All parts in contact with ground coffee are made of SUS304.
- The hopper is fully welded and polished, easy to clean.
- Sensor for missing unfilled capsule, missing cap indicator, cylinder return position sensor.
- The fault is automatically displayed on the human-machine interface.

**Technical Parameters:**

<b>Model</b>	<b>KFZ-1</b>
Filling head	1
Performance	3000 cups/hour
Occupancy	1-30 (adjustable)
Power	2.5 kW
Voltage	380V 50Hz
Weight	800 kg
Dimensions	1300 mm * 1200 mm * 2000 mm
