

## *FHD Series Dry Powder Mixing Machine Cream Mixer Machine*

This machine is widely used for mixing powder and granular materials in pharmaceutical, chemical, feed, metallurgy and other industries.

### **Features**

1. This machine is designed according to GMP standard, compact structure, convenient operation, safe and efficient.
2. For special materials, vacuum feed and sealed butterfly valve can be used for dust-free operation. (Feeding methods include manual feeding and vacuum feeding, the specific method is determined by the user).
3. The inner wall of the mixer is smooth, without dead corners, and has a unique four-direction mixing trajectory in the material cylinder, with a uniformity of 99%.
4. The mixing precision is high and the speed is fast to achieve the ideal mixing effect.

### **Technical parameters**

<b>Model</b>	<b>FHD-180</b>	<b>FHD-330</b>
Total volume	0.18m <sup>3</sup>	0.3m <sup>3</sup>
Production capacity	40kg/num	60kg/num
Mixing time	4-8min	6-10min
Tank rotation speed	12rpm	12rpm
Overall dimensions	1178X680X1700mm	1880X680X1700mm
Total power	1.1kw	1.1kw
Weight	290kg	300kg
Total rotation height	1870mm	1870mm
