

Rice Flour Production Line FSJ-420

The production line is a fully automatic complete plant for Oatmeal, baby rice flour, snowflake powder, potato flour, starch.

The material is put into the crushing chamber, and is pulverized by the impact, shearing, friction and collision between the materials between the rotating toothed disc and the fixed disc which are rotated at a high temperature, and is filtered by the screen to become the desired powder.

Technical Parameters:

Model	FSJ-420
Grinding fineness (mesh)	60-80
Production capacity (kg/h)	400-500
Spindle speed (r/min)	4000
Host power (kw)	11
Dimensions. length X width X height (mm)	3500x 820x 2500
