

ZG8-200 Rotary Pouch Packaging Machine

This machine represents a climax for modern packaging technology. This machinery is created through precise engineering and innovative automation to facilitate packaging in different industries. It's versatile making it beneficial in optimizing packaging operations for most businesses ranging from food to pharmaceuticals.

Technical Specification:

Model	ZG8-200
Packaging Type	Rotary Pouch
Packaging Material	Laminated Film (PE, PET, Aluminum)
Pouch Size Range	Width: 80mm – 200mm; Length: 100mm – 300mm
Speed	Up to 60 pouches per minute
Filling System	Auger Filler, Piston Filler, or Multi-head Weigher
Sealing Type	Heat Sealing
Power Supply	220V, 50Hz/60Hz
Power Consumption	4.5kW
Air Pressure	0.6 MPa
Air Consumption	0.8 m ³ /min
Machine Weight	Approximately 1200kg
Machine Dimensions	1600mm (L) x 1100mm (W) x 1400mm (H)
Control System	PLC Control with Touch Screen Interface
Optional Accessories	Date Coder, Nitrogen Flushing System, Vacuum System
