

ZE-200AL Rotate Liquid Premade Pouch Packaging Machine

Experience the fusion of speed and precision with our Rotate Liquid Premade Pouch Packaging Machine. Its compact, durable design delivers unparalleled efficiency, transforming your packaging process.

Re-engineering the horizon of liquid packaging, we present the Rotate Liquid Premade Pouch Packaging Machine. This tool is not only versatile and robust but offers unmatched efficiency in the packaging process.

Compact and Durable Design

Despite its small footprint, our machine doesn't compromise on sturdiness. With a robust build, it's designed for the long haul, truly an investment that gives back.

Quick and Quality Packaging

Speed meets precision in this machine, enhancing your packaging tasks without compromising the quality of the process.

When it comes to your packaging needs, the Rotate Liquid Premade Pouch Packaging Machine is a reliable choice, offering seamless, high-performance solutions.

Technical Parameters

Model:	ZE-200A
Bag Width	100×200mm
Bag Length	150×300mm
Packing Speed	30-55 bags/min
Packaging material:	PET/AL/ CPP And Composite Film Bag
Total Weight:	1200KG
Dimensions:	2170*1540*1420
