

CPP-600 Automatic Case Packing Machine

Automatic Case Packing Machine is an automagical equipment gathering the case opening, stocking, casing, sealing and other functions in one machine.

CPP-600 Automatic Case Packing Machine is an automagical equipment gathering the case opening, stocking, casing, sealing and other functions in one machine. We can also take the optional mechanical hand to achieve the labeling on the cases and cases stocking for further transportation. The stable speed of this machine can reach 4 cases per minutes. All the performances of the machine have been reach the top level technology of the world.

Whole machine adopts the entire servo system, each working station equipped with the sensors case lacking detecting, material inlet detecting, stacking overloading, case position detecting and so on, reaching the result of whole progress monitoring and controlling.

This machine has the advantage when applying to the complicated packing progress like irregular cases, carton board inserting, leaflet inserting, brochure inserting and so on, widely used in pharmaceutical, cosmetic and daily chemical mass production enterprise.

Specification

- Speed: 360 cases/hour
- Case size: Min 300x250x200mm Max600x400x400mm
- Power: AC 380V 3P 50HZ 7500W
- Air pressure: >0.6MPA
- Air Consumption: <1CMB/HOUR
- Dimension: 4000*2000*2600 mm
- Weight: 1200kg
