

## ***SF-2.0GT Food & Snacks High Speed Multihead Weigher Packing Machine***

The Food & Snacks Continuous VFFS High-Speed Packing Machine is designed to efficiently package irregular, lumpy, and granular products, including candies, puffed snacks, chips, small biscuits, dried fruits, nuts, and more.

### **Features**

- The equipment frame is made of 304 stainless steel, which conforms to the food QS and pharmaceutical GMP health standards;
- Equipped with safety protection, in line with the requirements of enterprise safety management;
- Adopt independent temperature control system, temperature control is accurate, ensure the sealing is beautiful and smooth;
- Servo motor film drawing, PLC control, touch screen control, automatic control ability of the whole machine, high reliability and intelligence, high speed, high efficiency
- Double belt film drawing, film drawing system and color code control system can be automatically adjusted by touch screen, simple operation for sealing and notching correction.
- The touch screen can store a variety of packaging process parameters of different products, and can be used at any time without adjustment when replacing products.
- The machine is equipped with fault display system, which can help troubleshoot in time and reduce the requirement for manual operation;
- The whole set of equipment includes the whole packaging process from material conveying, metering, pinning, bag-making, filling, sealing, cutting and product conveying;
- It can be made into pillow bags, gusset bags, hanging bags, and string bags according to customer needs.
- The machine adopts closed structure to prevent dust from entering the machine effectively.

## Technical Parameters

Model	SF-2.0GT
Bag sizes	L 100-400mm W 80-250mm
Packing speed	80-150 bags/min
Measuring range	20g-500g
Packing material	PET/VMPET/PE
Air Consumption	0.65 m3 /min
Power and voltage	110/220/380V, 50-60HZ, 3KW
Machine dimension	L 1080 * W 1300 * H 1400 mm
