

Automatic Corner Wrap Tamper-evident Labeling Machine SBM-CWLM150

Corner Wrap tamper-evident labeler is suitable for corner labeling for various carton box products. Adapt inline continuous labeling without product pause. Which is most suitable tamper-evident & corner labeling product within the market.

Human Technology Adjustment, No Need For Complicated Part Change Over

Well designed structure efficiently adjust applicator position and related assembly, complicated part change over is not required. Through touch screen will able to proceed detail and specific settings.

Monitoring And Management To Ensure Product Perfection

Equipped with production quantity set and precount function for production monitoring purpose. Able to customize equip various detection and warning function for the production management. To ensure labeling accuracy precision and meet strict quality demand.

Features

- The main labeler structure is manufactured from S304 stainless steel with anodized process and high quality aluminum.
- It is complied with GMP standard that provides easy maintenance and for a long durable life.
- The mobility castor and stainless steel fixing nut are designed to flexibly move the machinery to support another production line to boost the invest benefits.

- It provides a wide range adjustment ability by equipped with hand wheel mechanism for easy adjustment of applicator and depended on products.
- Smart label length set to quickly achieve for perfect position of label by counter.
- Missing label set prevents product miss-labeled to ensure product accuracy while production and fulfill production QC procedure.
- A built-in counter can either run freely keeping track of the number of products labeled to control the production.
- Production preset function that the labeler automatically stops when the desired numbers of products have been labeled for efficient production management.
- Auto label start up mode while the power been switch on, the machine will enter labeling condition automatically as previous run without reset.
- Labeling delay function that it is ideal for small scale adjustment and could do Calculate digitally for dispensing speed and position.

Technical Info

Model	SBM-CWLM150
Labeling Speed	30-80 pcs per min (labeling speed is related to operation proficiency)
Labeling Accuracy	±1mm (excluding product and label error)
Product size(LxWxH)	80-300 x 50-100 x15-100 mm(can be customized)
Label Size(WxL)	20-150 x 6-100 mm (Can be customized)
Power supply	AC 220v, 60Hz,or Optional
Power	Approx. 1020w
Air Consumption	0.6 Mpa
Dimension(LxWxH)	Approx. 1700×650×1550mm
Machine Weight	Approx.160kg
